

Friday March 13th, 2026 (2h)

Topics:

- Read through the sprint description
- Read through the sprint rubric
- Analysed Last sprint performance and pointed out what can be done better
- Decided on doing all the features demanded to get full marks

Friday March 20th, 2026 (2h)

- Picked unique feature: calorie counter based on BMI
- Unique feature approved by TA
- Worked on user stories for the sprint
- Split user stories into tasks
- Assigned tasks

Besher: add user stories for the unique feature + GitHub tasks

And I'll add the frontend for the unique feature without it working properly

Carl: meal planner weekly grid page

Jean-claude: acceptance tests

Jerrish: editing and changing the meal plan on carl's branch with Valeria
(Front end + Backend)

Nicholas: age, weight, height, things to calc. bmi + goal on *frontend*

Valeria: edit & delete button for weekly meal. Transfer US and tasks on git,
meeting minutes & contribution

Wednesday March 25th, 2026

- Progress check of each teammate : everything and everyone is on track
- Planned to meet friday before demo to test everything together
- No major blockers identified
- Quickly discussed on the priorities for the next few days:
 - Make sure everyone's code is running smoothly
 - Work on documentation (Valeria)
 - Meeting minutes
 - Team members contributions

Friday March 27th, 2026

- Finished user stories on github
- Acceptance tests running
- Plan next sprint
