

Team Contribution to sprint 3

Nicholas:

- Added Biometric input data (Age, Weight, Height) and a Meal Tracking Goal input selector in the user profile webpage. (45 minutes)
- Implemented (after researching how BMI works and what's the best method to implement this) a BMI calculator button in the user profile webpage that calculates the user's BMI based on the biometric data input. (1 hour)
- Added a read-only "input" field that displays the BMI calculator's result value. (5 minutes)
- Added an alert pop up window that notifies users that are under 20 years old that their BMI calculation result might not be an accurate measurement of their body:mass health and that they should contact a health professional if they want a more personalized, accurate result. (10 minutes)

Valeria:

- Edit button for the weekly meal grid
- Delete button for the weekly meal grid (worked with Jerrish) (1h)
- Transferred user stories to github and tasks to github and applied proper relationships to them (1h)
- Meeting minutes logged (5mins/meeting)
- Created and shared google doc for team contribution (2mins)

Besher:

- Sprint instructions analysis/ figuring out what is needed for the sprint (30 mins)
- Added the filter by calories feature for the unique feature(45 mins)
- Added the calories feature when editing the recipe(1 hr)
- Added the calories feature when adding a recipe(1 hr)
- Added the User Stories for the unique feature on the product backlog(30 mins)

Carl:

- Create a database table for meal planner.
- Added two unit tests (add recipe to meal planner + try to add duplicate).
- Added meal planner page.
- Added logic to add a recipe.

Jean-Claude:

- Did acceptance tests (1h)
- Setup biometrics table to database and linked to user (1h)
- Updated post and get routes in back end to also fetch biometrics (1h)

Jerrish:

- Edit button for the weekly meal grid
Delete button for the weekly meal grid (worked with Valeria) (1h)
- Transferred user stories to github and tasks to github and applied proper relationships to them (1h)
- Meeting minutes logged (5mins/meeting)
